AN INTERNATIONAL PRESENCE

We have bases in France and the United Kingdom, and an offshore development centre in Casablanca (Morocco).

OUR CLIENTS: WORLD LEADERS IN THE UTILITIES SECTOR

Our clients are the key accounts in the utilities sector. They have been calling on our expertise in the Oracle Utilities suite since 2007. IT-NewVision has thus built its expertise through working with landmark utility companies: Suez and Veolia in the water sector, EDF and ENEDIS in electricity. We have contributed several times to projects migrating clients' information systems to the Oracle Customer Care & Billing solution.

OUR MISSION

To be at the heart of the challenges in the utilities

We deploy innovative business and technology solutions that meet the emerging needs of our clients.

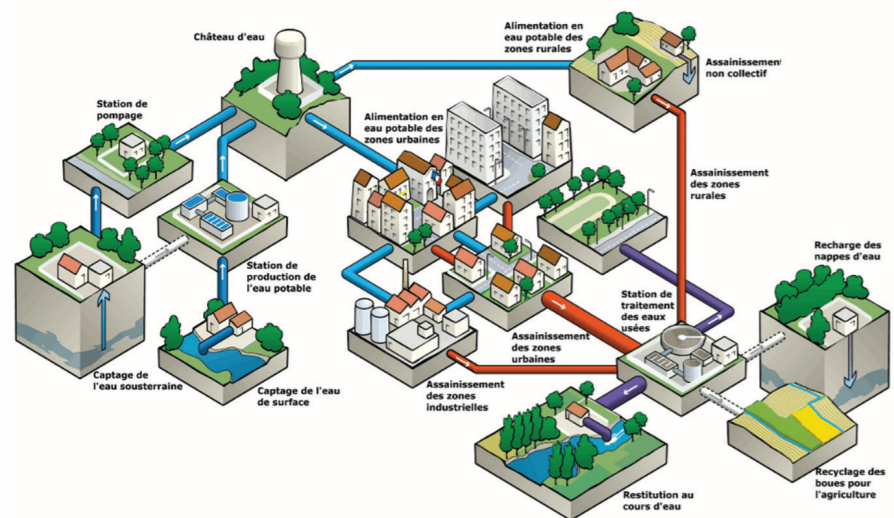

WWW.ITNEWVISION.COM

SUPPORTING THE MODERNISATION OF THE UTILITIES SECTOR

IT-NewVision has been supporting the world's leading utilities since 2007. Based on a solid partnership with Oracle, we have constructed projects with major players in the field of information systems.

IT-NewVision operates as an expert in the architecture and implementation of client information systems and business support through to application deployment.

IT-NEUVISION: MANY SOURCES—ONE DIRECTION

UTILITIES: A MAJOR ECONOMIC SECTOR PIONEERING SUSTAINABLE DEVELOPMENT

The challenges facing businesses in the energy sector relate to the deployment of new technologies as a result of fluctuations in regulations, renewable energy and the optimisation of the whole energy chain, from generation to consumption.

With our in-depth understanding of these changes and the problems faced by utilities, our company can provide the most appropriate solutions tailored to the needs of players in the sector.

Drawing on its very wide palette of technical, functional and business skills, IT-NewVision's mission is to create and generate the methods and tools that will enable companies in the sector to make their strategies a reality. In our constant search for innovative solutions, our clients are above all our partners.

IT-NEUVISION: IT'S ALL ABOUT U-TILITIES

OUR IT EXPERTISE

Since its beginnings, the IT-NewVision strategy has been to develop very strong IT expertise using advanced technologies in the utilities sector. Our specialists are recognised for their technical expertise in the Oracle Utilities suite of solutions (CC&B, MDM, MWM, SGG, ODM etc.).

Our added value lies in our ability to adapt these solutions technically to our clients' needs. We operate at all stages, from deployment to commissioning and maintaining the tools, and we provide support to ensure our customers get the most from these new technologies.

OUR BUSINESS SPECIALISATIONS

As our partnerships have evolved, we have specialised in utility activities involving billing, remote meter reading, smart metering, customer relationship management and payment collection. More recently we have also worked in the areas of smart grids, big data, defining the implementation of the analysis and ordering business processes, energy efficiency and scientific data analysis using artificial intelligence algorithms.

We are thus able to provide dual expertise to help deliver your ambitions for transformation. Able to intervene at any stage of a project, our specialists implement evolutions of the system and help you put your new processes into practice.
